GitHub | Year of Passing: 2027

OBJECTIVE

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning with a strong foundation in Software Engineering, Full Stack Development, Data Structures and Algorithms, Object-Oriented Programming, and Database Management Systems. Experienced in developing scalable web applications, REST APIs, and data-driven software solutions through internships and academic projects. Proficient in Python, Java, SQL, React, and Flask, with a strong interest in building reliable technology solutions and continuously learning emerging technologies, including responsible AI, to solve real-world business problems.

EDUCATION

Bachelor of Technology (B.Tech.) in Computer Science and Engineering

2023 – 2027

Specialization: Artificial Intelligence & Machine Learning

SRM Institute of Science and Technology

CGPA: 9.57/10

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, SQL, JavaScript

Software Development: Full Stack Development, Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), Software Development Life Cycle (SDLC), REST API Development

Frontend Technologies: React, HTML5, CSS3, JavaScript

Backend Technologies: Flask

Database: MySQL

Core Subjects: Database Management Systems (DBMS), Operating Systems, Computer Networks

Tools & Platforms: Git, GitHub, Docker, Kubernetes, AWS (Fundamentals), Visual Studio Code

EXPERIENCE

Data Analytics & RPA Engineer Intern

Mar 2025 – Apr 2025

Renault Nissan Automotive India Pvt. Ltd.

- Developed interactive Power BI dashboards to analyze supply chain performance and support data-driven business decisions.
- Automated repetitive business workflows using Robotic Process Automation (RPA), improving operational efficiency and process reliability.
- Processed and analyzed enterprise datasets using Python and SQL while collaborating with cross-functional teams to deliver scalable software solutions.

AI & Automation Research Intern

Apr 2026 – Present

Tube Products of India – Murugappa Group

- Developing an industrial monitoring system using Python for real-time sensor data processing and automation.
- Building reliable monitoring workflows for manufacturing operations using automation technologies.

- Collaborating with cross-functional engineering teams to improve system reliability and operational efficiency.

PROJECTS

Electra – Secure Internal Digital Voting System

- Developed a secure full-stack web application using React, Flask, MySQL, and REST APIs.
- Implemented authentication, role-based access control, CRUD operations, and backend API integration.
- Designed a scalable relational database architecture for secure and efficient data management.

Adaptive Behavioral Fingerprinting for Black-Box AI Security

- Developed a web-based software application using Flask to analyze and classify the behavior of black-box AI models through a structured response-processing pipeline.
- Designed and implemented modular components for request handling, feature extraction, response analysis, and machine learning classification following software engineering best practices.
- Built REST APIs and integrated the frontend, backend, and machine learning modules, achieving approximately 86% detection accuracy while improving system scalability and maintainability.

SignX – Sign Language Recognition System

- Developed a full-stack web application that recognizes sign language gestures using computer vision and deep learning models.
- Designed and integrated frontend, backend, image processing, and machine learning modules following a structured software development lifecycle.
- Achieved 92% recognition accuracy and won recognition under the Web Application category for delivering an accessible and user-centric software solution.

LEADERSHIP & ACHIEVEMENTS

- President, Tamil Computing Centre (TCC), SRM Institute of Science and Technology, leading technical events and student activities.
- Winner of Innovatex'25 National Hackathon for developing an innovative software solution.
- Runner-up in Pentathlon 2.0 National Hackathon for building a real-world technology solution.
- Contributed to the Tamil translation of an Artificial Intelligence textbook published under the Government of Tamil Nadu.
- GitHub Copilot Certified.
